SUMMARY

AI Engineer with 1.5+ years of experience in AI, automation, and full-stack development. Founder and Co-Founder of [Innovexia](#), leading the development of AI-powered platforms, automation systems, and scalable digital solutions for startups and businesses.

Worked as an Artificial Intelligence Engineer Intern at AZKASHINE Software & Services (Riyadh), contributing to ML/DL models, NLP, computer vision, API integration, and deployment using Python, TensorFlow, and PyTorch. Previously completed an internship at ICT Hub Egypt, contributing to the development of a custom company chatbot.

Experienced in building scalable web platforms, AI workflows, and automation systems, with multiple projects showcased on GitHub, including BAU-EVAL—an AI-powered coding assessment platform currently under development.

PROFESSIONAL EXPERIENCE

Co-Founder & AI Engineer — [Innovexia](#)

Dec 2026 - Present

- Leading the development of AI-powered platforms, automation systems, and scalable digital solutions for startups and businesses.
- Building full-stack web applications and AI workflows using modern technologies and automation tools.
- Designing smart automation systems for lead qualification, notifications, and business process optimization.

Freelance AI & Web Developer

June 2024 - Present

- Delivered AI-powered and full-stack solutions for clients across education and business sectors.
- Created a school management website with dedicated portals for students, teachers, and parents, improving academic communication and resource access.
- Built a startup company website to establish their digital presence and attract clients.
- Developed an n8n-based automation workflow to qualify leads, store them in a database, and send smart notifications — successfully implemented as part of a technical interview challenge using only free-tier tools.

AI Engineering Intern — AZKASHINE Software & Services Pvt. Ltd.

Sep 2025 - Jan 2026

Delivered AI-powered and full-stack solutions for clients across education and business sectors.

Created a school management website with dedicated portals for students, teachers, and parents, improving academic communication and resource access.

Built a startup company website to establish their digital presence and attract clients.

Developed an n8n-based automation workflow to qualify leads, store them in a database, and send smart notifications — successfully implemented as part of a technical interview challenge using only free-tier tools.

AI Engineering Intern — ICT Hub

July 2024 - Aug 2024

- Assisted in developing a custom AI chatbot for the company, enhancing client engagement.
- Applied NLP techniques for more accurate and context-aware responses.
- Collaborated on integrating the chatbot with the company's web platform.

PROJECTS

Deep Learning for Automated Detection of Diabetic Retinopathy

Developed a deep learning pipeline to detect diabetic retinopathy from retinal fundus images. Trained and compared multiple CNN architectures (ResNet-50, InceptionV3, Xception, DenseNet121), achieving best results with DenseNet121. Applied advanced preprocessing, data augmentation, and evaluation techniques for optimal accuracy.

Real-Time Object Detection with YOLO and Webcam

Implemented a real-time object detection system using YOLO integrated with live webcam input. Optimized inference for speed and accuracy, demonstrating real-time computer vision applications.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C++	Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, OpenCV, Transformers (Hugging Face)	Deep Learning: CNNs, RNNs, Transfer Learning, LLMs (e.g., LLaMA, GPT)
Data Science: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebooks	Web Development: FastAPI, Flask, Node.js, React.js, HTML/CSS, RESTful APIs	Databases: PostgreSQL, MongoDB, MySQL
Tools & Platforms: Git, Docker, AWS (EC2, Lambda, S3), GitHub, VS Code	NLP: Text preprocessing, Sentiment Analysis, Chatbot development, LangChain	Cloud & Deployment: Streamlit, Docker Compose
Version Control: Git & GitHub (branching, pull requests, CI/CD basics)		Automation & Workflow Tools: n8n, Apache Airflow, Luigi

EDUCATION

BAHÇEŞEHİR UNIVERSITY

- Bachelor of Engineering and natural science, Artificial Intelligence

ADDITIONAL INFORMATION

- **Languages:** English, Arabic, Turkish, French, spanish.
- **Certifications:** Oracle Cloud Infrastructure Generative AI Professional, Neural Networks and Deep Learning, Convolutional Neural Networks, Machine Learning with Python, Generative AI Fundamentals, Introduction to Image Processing, Image and Video Processing: From Mars to Hollywood with a Stop at the Hospital
